

ELITE

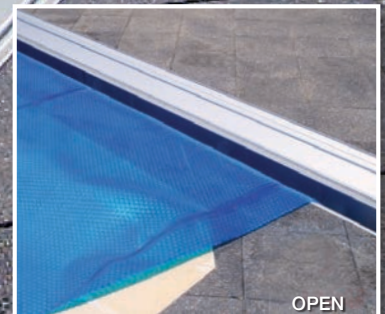

Inground Hideaway® Pool Cover System

Award Winning Hideaway® System

AUSTRALIAN
MADE

Your pool blanket & roller
are hidden away here
underneath the aluminium lid

The New Generation Elite Hideaway®. Easy on the eye, easy to use.

Easy on the eye, easy to use... that's Elite Hideaway® Pool Covers. When your pool cover is not in use the cover is stored neatly away out of sight. It's easy to operate, simply lift the lid and pull out the solar blanket with Elites exclusive detachable "Pull cord system".

When storing simply pop the (no need to bend over) handle onto the special 90° gear box and turn. It's that easy!

The other unique benefit is this range can be easily installed to new and most existing pools of almost any shape and size. The award winning Elite Hideaway® Pool Cover not only is aesthetically pleasing but it saves time, money and our most precious resource, water. Plus adds resale value to your home! Out of sight and out of mind, that's the Elite Hideaway® difference.

- Marine Grade anodized aluminium lid. For ease of use & longevity.
- Fully engineered self-supporting underground enclosure system.
- Designed and built in Australia for Australian conditions.
- Blanket is stored away, out of sight when not in use (this extends the pool blanket life).
- Save time, money and add value to your home.
- Manual (handle) or automatic remote control option.
- To open - lift the lid and simply pull out the pool cover when required (one person operation).
- To close - wind blanket back into the box placing long handle onto 90° gear box and turning, when complete place handle inside the box.
- DIY installation or we can install for you.
