

The Ultimate Pre-mixed Pool Plaster

Contrary to popular belief, all pool finishes are not the same!

Rainbow Quartz pre-mix has been developed and manufactured especially for concrete swimming pools. It's easy to understand why Rainbow Quartz is the leader for quality and choice, with our exclusive range of colours, varying amounts and sizes of coloured aggregates, your concrete swimming pool will have the ultimate finishing touch.

Rainbow Quartz

The ultimate finishing touch

Why choose Rainbow Quartz Pre-mix?

Rainbow Quartz is manufactured in Perth at our new custom built factory in Enterprise Park Industrial Estate, Wangara. It has been developed to cater for the growing demand for more exotic and exciting colours for today's modern concrete swimming pools. Many years of development and research by our company, with particular regard to Western Australia's harsh climate and environment, in conjunction with pool builders, pool plasterers etc., combined with ongoing field testing ensures that Rainbow Quartz will remain the leaders for Quality-Innovation and Durability. A blend of the finest Metallic Oxides and Coloured Aggregates combined with a careful selection of the finest quality graded quartz sands, ensures you have the *Ultimate Finishing Touch* to your new or renovated concrete swimming pool.

Quality Control

Strict quality control ensures constant material and colour throughout the manufacturing and packaging process, which guarantees even colour and texture throughout your pool plaster. The old method of mixing/blending on site when it was just sand and cement has served the industry well over the years, but with the advent of coloured plasters mixing/blending has become a complex operation, so mixing on site of coloured plaster is not an option any more as one mistake will end up with a patchy or streaky pool.

Smooth and easy care surface

Unlike some surfaces which tend to be rough and harbour algae etc., a pool plastered correctly with 'Rainbow Quartz Pre-mix' is smooth and gentle to the skin, non-abrasive and non-slip for safe swimming.

Rainbow Quartz Pre Mix is hard and durable

Quartz is one of the hardest materials on earth, on a scale of 1 to 10, Quartz is 7 (10 being the hardness rating of diamonds). The coloured aggregates in the pool plaster are a natural quartz aggregate and are coated with permanent inorganic pigments. These create a random pattern in the plaster, with literally millions of coloured aggregate particles embedded throughout the plaster for a smooth, long lasting

for you and your swimming pool
