

SPARKLE COAT

– **PROTECTS** –
your pool coating

– **STUNNING** –
sparkle effect

– **SAVE MONEY** –
on maintenance costs

Stunning Finish

It creates an amazing diamond sparkling effect to your pool's surface while also providing extra protection from the sun's damaging rays, adding years to the life and enjoyment of your pool investment.

“Sparkle Coat” is a fibreglass resin Gel Top Coat designed to be used as a decorative and protective coating in the renovation of fibreglass and concrete pools.

Lengthens Life

Once applied, it will smoothen the overall appearance of the surface. It provides a water and chemical resistant barrier which will help to prevent your pool surface from fading, staining and discolouration.

Protective Shield

It also contains three separate types of Ultra Violet light stabilizers which shield from the damaging effects of the harsh Australian sun.
