LED Pool Lighting

FLUSH NICHE LIGHT

QUANTUM WN SERIES

Quantum Overview

The QUANTUM WN series is Spa Electrics flagship model; its premium construction and ultra-flush design provides superior light distribution while seamlessly blending into the pool design.

The QUANTUM WN series also features Spa Electrics' patented detachable cable system for simple installation and external heat sink for superior LED performance and longevity.

Available with a choice of rim colours and in both Single and Multi-Colour formats, the QUANTUM WN series is the ultimate choice for your next pool.

MINI-NICHE LIGHT

atom EM SERIES

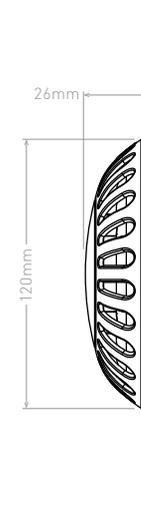

Atom Overview

The ATOM EM series combines the premium design and LED performance of the QUANTUM range in a package small enough to fit anywhere. Perfect for pools with step and beach entries that require illumination but with the performance to light even the largest of pools.

Featuring Spa Electrics' patented detachable cable system and external heat sink for superior LED performance and longevity ensuring the ATOM EM will keep performing year after year.

Available in a choice of Single and Multi-Colour formats, the ATOM EM will make your pool look truly spectacular!

SURFACE MOUNT LIGHT

photon GK SERIES

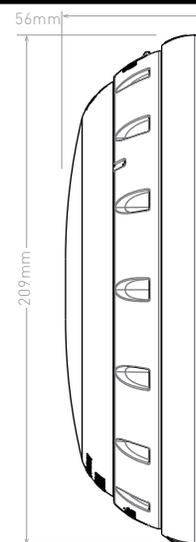

Photon Overview

The PHOTON GK series is a surface mounted light that offers you more for less!

Utilising the same LED technology as the QUANTUM WN range, the PHOTON GK provides intense illumination and brilliant colour shows while reducing the installation costs usually associated with niche lighting.

Like all Spa Electrics LED products, the PHOTON GK series utilises an external heat sink for maximum LED efficiency and longevity and is available in a choice of single and Multi-Colour formats.

LED colour guide

MULTI colour

With the Spa Electrics Multi Colour lighting range, the world is your oyster. With the freedom and flexibility to choose between 8 intense static colours and 2 mesmerising and seductive colour shows, all with the flick of a switch.

With industry leading continuous sync technology, the Spa Electrics Lights can sync with an endless number of lights in the same pool and even across different model lights in the Spa Electrics range.

All this combined with Spa Electrics colour memory feature providing simple one-touch operation for hassle free colour choice.

SINGLE colour

Experience intense illumination with a choice of 3 beautiful colours to compliment your pool or spa. The Spa Electrics Single Colour range is the essence of stunning pool lighting.

MULTIPLUS

The All New **MULTI PLUS** from Spa Electrics represents a new generation in Multi Colour pool lighting.

With five different operating modes, the **MULTI PLUS** can operate via a standard wall switch or by using the iRIS lighting controller. The **MULTI PLUS** can also integrate seamlessly with most pool automation systems.

Along with this comes leading edge LED advancements with the introduction of an RGB+White LED array; providing beautifully clean white illumination and stunning colour shows never before seen in pool lighting.

The all new **MULTI PLUS** from Spa Electrics is available across our entire new pool and Retro-fit lighting range.

A WORLD OF COLOUR... AT YOUR FINGERTIPS

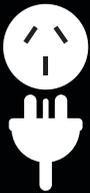

Premium handset design.

Capacitive touch screen remote constructed from premium materials and scratch resistant acrylic screen.

Long Range RF.

Never lose signal again, with Spa Electrics long range RF you can control your lighting system from over 50 meters away.

Plug & Play installation.

Simply plug your Spa Electrics transformer into the base of the **iRIS** and take instant control of your lighting system.

Suitable for new & existing pools.

Using Spa Electrics own patented technologies, this system can be installed on existing pools without the need to replace cables or transformers. Simply install an **iRIS** compatible light and **iRIS** controller to your existing pool light system.
